

Sprint Report #3

December 3, 2015

Team Overview

Project

ARM Cluster

Members

- Andrew Hoover
- Samantha Kranstz
- Christine Sorensen

Sponsor

Dr. Christer Karlsson

Meeting Times

Tuesdays and Thursdays at 1:00pm

Sprint Overview

Setback

Deliverables

- Cluster

Activities

Team

- Assembled cluster
- Debugged boot-up error

Andrew Hoover

- Installed LINPACK
- Assembled cluster
- Replaced broken ODROIDS
- Fixed IP address on the ODROIDS
- Connectd all ODROIDS over network
- Accessed the internet through the ODROIDS

- Mounted home directory of Snow White on the other ODROIDS
- Wrote script to shut down all ODROIDS
- Wrote script to run LINPACK on ODROIDS for specified number of processes
- Removed the sudo password
- Ran LINPACK with MPI code on the clusters
- Script to edit the networkinterfaces file to be able to access internet

Samantha Kranstz

- Started client presentation

Christine Sorensen

- Assigned hostnames to each of the ODROIDS
- Allowed ODROIDS to remote login to the others via hostname
- Replaced broken ODROIDS
- Wrote MPI code to run on all cores of the clusters
- Updated design documentation
- Wrote script to mount home directory of Snow White onto all ODROIDS at once
- Added ODROID's hostnames to the others' known hosts list
- Ran LINPACK with MPI code on the clusters
- Wrote sprint report

Work that is carried over into Sprint 3 is as follows:

- Design cluster
- Build cluster
- Benchmark cluster
- Test message-passing

Backlog

- Build the cluster
- Code for the cluster
- Benchmark the cluster
- Experiment with different topologies
- Create a new mode of communication

Goals

- Go to research symposium
- Prepare Design Fair
